SCOPE OF WORK

1. Background

1.1 TransLink has an established Enterprise Digital Strategy ("EDS") with a comprehensive roadmap of initiatives in pursuit of achieving TransLink's digital vision. However, TransLink is experiencing significant growth in data, analytics, and Artificial Intelligence ("AI") needs, driven by factors like AI advances, digital transformation and a growing expectation from business users and leaders to use data and AI. With the ongoing demands, the Enterprise is facing increasingly complex data ecosystems, and a Data, Analytics and AI Strategy will be essential to ensure the Enterprise continues to leverage its data assets and maximize business value.

1.2 To support the achievement of TransLink's 10-Year Vision, Transport 2050, and related business strategies, an opportunity exists for a consultant to help develop TransLink's Data, Analytics and AI Strategy and roadmaps to provide clear direction and alignment across the Enterprise, and recommend how to leverage our data, people, processes, and technology to maximize business value from investments in data, analytics and AI.

1.3 TransLink Enterprise consists of TransLink's corporate parent company and three Operating Companies consisting of: BC Rapid Transit Corporation ("BCRTC", rail division), Coast Mountain Bus Company ("CMBC", bus division), and Metro Vancouver Transit Police ("MVTP"). The four entities are organized into several divisions including:

- Finance (TransLink and Operating Companies)
- Operations (Operating Companies)
- Maintenance (Operating Companies)
- Business Technology Services (TransLink)
- Customer Communications & Public Affairs (TransLink)
- Engineering (TransLink)
- General Counsel (TransLink)
- People & Culture (TransLink)
- Real Estate, Commercial Strategy, & Innovation (TransLink)
- Transportation Planning & Policy (TransLink)

1.4 TransLink's Business Technology Services ("BTS") division is led by the Office of the CIO and is a shared service for all business units. BTS provides technology planning, delivery, and operations services for most technologies across the Enterprise, except for BCRTC's Operations Technology and Metro Vancouver Transit Police's police-specific infrastructure and systems services. There are other pockets of informal and ad-hoc technology-related delivery and support that occur in other parts of the Enterprise with various levels of involvement from BTS.

2. Project Description

2.1 TransLink is requesting proposals from qualified proponents to help create an Enterprise Data, Analytics and AI Strategy that will strength our data culture in order to advance our Enterprise Digital Strategy and support the longer-term goals of our organization.

2.2 The Strategy will be used to leverage data as a strategic asset, which will help enable better decision-making, and deliver more effective services. Employing a highly collaborative approach, the engagement will look to achieve the following outcomes:

i. **Update the Data and Analytics Strategy** and make recommendations for how to continue to mature processes, people, technology, data literacy, quality, management, and governance;
ii. **Develop the AI Strategy and define the AI vision** to identify how AI technology will directly contribute to our corporate goals;
iii. **Assessment of the current data and digital state** and identify capabilities, opportunities, gaps, dependencies, and risks and make recommendations for how to improve our maturity levels to support our overall digital transformation objectives;
iv. **Develop clearly articulated and detailed roadmaps and investment plans** that identify options and recommendations for actionable initiatives that align with and enable the advancement of the Enterprise Digital Strategy;
v. **Develop a Benefits Realization Framework** for measuring and tracking benefits that help support further data, analytics, and AI investments in the future.
vi. **Review of business developed solutions** to identify risks and opportunities for greater collaboration and alignment with enterprise goals;
vii. **Identify potential changes and/or considerations** required for future technology investments; and
viii. **Enterprise leadership alignment** of the optimal options and prioritized initiatives for implementation.

2.3 Engagement and solicitation of input will be expected to be conducted with key stakeholders across the Enterprise. At minimum, the stakeholders to be consulted include the following (e.g. surveys/ interviews/ workshops):

i. TransLink CIO, BTS senior leadership, and key staff
ii. TransLink Customer Communications & Public Affairs (including Digital Marketing)
iii. TransLink Planning & Policy (including New Mobility)
iv. TransLink People & Culture
v. TransLink Finance (including Strategic Sourcing and Sustainability)
vi. TransLink Engineering
vii. TransLink Real Estate, Commercial Programs, and Innovation
viii. TransLink Legal
ix. TransLink Office of the COO (including EDI, Indigenous Relations)
x. BCRTC senior leadership (Corporate Services, Operations, and Maintenance including Operations Technology/System Engineering)
xi. CMBC senior leadership (Corporate Services, Operations, and Maintenance)

2.4 Proponents are encouraged to familiarize themselves with TransLink's business strategy by reviewing the following:

- Transport 2050 | TransLink
- Ten Year Investment Plan | TransLink
- Customer Experience Action Plan
- TransLink Tomorrow
- Enterprise Digital Strategy – Executive Summary (see Reference Document section in the RFP)

3 Services

Specific services to be provided include, but are not limited to (proponents can specify additional services deemed necessary):

3.1 Conduct surveys, interviews, and workshops with stakeholders across Enterprise to solicit feedback and develop a comprehensive inventory of capabilities, opportunities, challenges, dependencies, and risks and provide clear direction and alignment with the overall Enterprise business objectives.

3.2 Deliver a detailed Enterprise Data and Analytics Strategy by assessing current data and digital state and determine business readiness and drivers.

3.3 Provide industry best practices recommendations for evolving data culture, people, governance and data literacy.

3.4 Deliver a detailed Enterprise AI Strategy by assessing current AI capabilities and determine business readiness and drivers.

3.5 Provide industry best practices recommendations for evolving our AI ambitions and AI literacy.

3.6 Articulate key goals and objectives with clearly defined use cases and longer-term actions.

3.7 Create a risk mitigation plan based on identified risks associated with AI use in the organization, including areas such as compliance, ethics, security, reputation, and other relevant impacts. Recommend an appropriate governing authority to oversee decision-making and ensure compliance.

3.8 Develop detailed and actionable roadmaps for executing the recommendations and priority initiatives based on the outcomes of the strategy(s).

3.9 Develop a comprehensive investment plan to highlight the capital commitments required to execute the roadmap.

3.10 Review options and recommendations with Enterprise leadership and key staff for alignment and understanding and adjust the Strategy, roadmaps, and investment plans as required.

4 Deliverables

The successful consultant will be responsible for providing, at minimum, the following set of deliverables:

4.1 Interim work products:

a) Regular status reporting to the project manager, project sponsor and project steering committee; and
b) Produce interim work products to facilitate the iterative nature of strategy development (including draft reports/presentations/executive summaries for review).

4.2 Final Data, Final Data, Analytics, and AI Strategy deliverables:

a) Documented current state assessment of data collection, use, share, protect, and reporting, and AI technology gaps and challenges;
b) Establish an AI Vision and a Strategy for business-use guidelines and steps for capitalizing on business value added opportunities;
c) Final future state with recommendations for quick-win use cases, improvements to policies, processes, and technologies, documented in a comprehensive roadmap. The roadmap will include key decisions, initiatives, timelines, and milestones.

d) Documented review of business developed solutions and the risks and opportunities for greater collaboration and alignment with enterprise goals;
e) Investment plans for successful roadmap execution;
f) A Benefits Realization framework that aligns with the Gartner Data and Analytics Practitioner Functions for Maturity and AI Capabilities for Maturity Model for measuring and tracking the benefits of the Strategy(s) progress against the intended outcomes of the strategy
g) The final report is expected to be no more than 25 pages in length (including supporting appendices, reference materials, and gathered artefacts);
h) Final presentations to Senior Leadership Team; and
i) A separate executive summary report to facilitate communications and updates to senior executive teams.

5 Location

5.1 The engagement will be conducted using a mix of onsite and virtual meetings, as well as in-person workshops, through the platform chosen by the selected proponent. (Note: TransLink uses Microsoft Teams). TransLink's head office locates in New Westminster, BC.

6 Optional Scope

6.1 Transit police (TSML) is going to conduct a similar strategy study following TransLink's. TransLink reserves the right to extend the awarded contract to cover the TSML's work if it proves to provide better synergy and efficiency.
